Message from the Chief Guest

Chief Guest
Director General
Department of Textile
People's Republic of Bangladesh

Dear Distinguished Guests and Fellow Alumni,

It is an honor to be here today at the 3rd Alumni Reunion of the Textile Engineering department of Daffodil International University. As the Director General of Bangladesh Government's Department of Textile, I am particularly proud to be a part of this event, which celebrates the achievements of our country's textile industry.

The textile industry plays a vital role in the economic development of our country, and the graduates of this department have contributed significantly to this industry. The education and training that you received here have equipped you with the skills and knowledge necessary to succeed in this field.

I am pleased to see that the Textile Engineering department of Daffodil International University is committed to providing its students with a well-rounded education that prepares them for the challenges of the industry. The department's focus on research and innovation is particularly commendable, and I am confident that its graduates will continue to make valuable contributions to the textile industry in Bangladesh and beyond.

As alumni, you represent the best of what this department has to offer. Your achievements are a testament to the quality of education that you received here, and I am proud to see that many of you have gone on to become leaders in the textile industry.

The government of Bangladesh is committed to supporting the growth and development of the textile industry, and we recognize the important role that institutions like Daffodil International University play in achieving this goal. We are proud to partner with this university and to support its efforts to train the next generation of textile professionals.

In conclusion, I would like to congratulate the Textile Engineering department of Daffodil International University on its 3rd Alumni Reunion. I wish all of you continued success in your careers and in life, and I look forward to seeing the contributions that you will make to the textile industry in the years to come.

Thank you.

Md Nuruzzaman

Message from the

Chairman, DIU

Chairman

Board of Trustees
Daffodil International University

Dear Textile Engineering Alumni,

I am delighted to welcome each of you to the 3rd Alumni Reunion of Daffodil International University's esteemed Textile Engineering Department. This occasion holds special significance as it unites the brilliant individuals who have not only excelled within our university but also gone on to make significant accomplishments in their careers and personal lives.

I take immense pride in the Textile Engineering Department's role as a cornerstone of our institution. We have always endeavored to equip our students with top-notch education and nurture them as leaders in their respective fields. Witnessing the impressive achievements of our alumni validates our commitment to delivering quality education and encourages us to continually improve.

The unique bond shared among our alumni is truly remarkable. The experiences and memories forged during your time at DIU have fostered lasting connections that have persisted through the years. It is heartwarming to see that despite the demands of your individual lives, you have made time to reunite with your fellow alumni and mentors today.

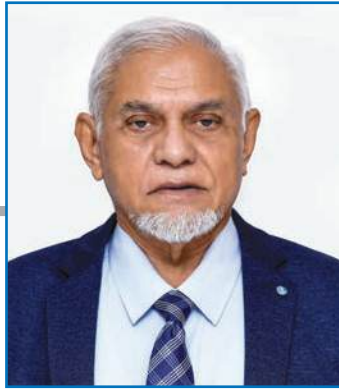

Your accomplishments stand as evidence of your unwavering dedication, hard work, and persistence. We believe that your time at DIU has played a pivotal role in shaping your personal and professional growth. May the knowledge and values instilled in you by our institution continue to guide your future endeavors.

I extend my sincere gratitude to the organizing committee for orchestrating this exceptional event. Organizing a reunion of this scale is no small feat, and their efforts are truly commendable. I also thank all sponsors and supporters who have contributed to making this gathering possible.

I wish you continued success in your future pursuits and remain confident that you will further elevate DIU's proud legacy.

Md. Sabur Khan

Message from the Vice Chancellor

Vice Chancellor
Daffodil International University

Dear Distinguished Alumni,

It is my great pleasure to welcome you all to the 3rd Alumni Reunion of the Textile Engineering Department at Daffodil International University. This is truly a momentous occasion as it brings together nearly 2000+ alumni from all over the world, demonstrating the strong bond that exists between our university and its graduates.

As the Vice Chancellor of this esteemed university, I am deeply honored to be a part of this assembly that celebrates the remarkable achievements of our alumni. This reunion is a testament to the education and values that you received during your time at Daffodil International University, and I am proud of every one of you for the successes you have achieved since graduating from our institution.

I want to express my sincere gratitude to the organizing team for their hard work in organizing and carrying out this reunion. We all warmly welcome this occasion, which has been made possible by their commitment and work of love. I would like to express my gratitude to the sponsors and supporters who contributed so generously to make this event possible. Their assistance made it possible for us to give you the extraordinary experiences; a big "Thank You" for the sponsors.

I wish you the best of luck in all of your future endeavors and I sincerely hope that you will continue to serve as an example for Daffodil International University alumni in the years to come.

Thank you

Professor Dr. M. Lutfar Rahman

Message from the Pro-Vice Chancellor

Pro-Vice Chancellor Daffodil International University

Dear Textile Engineer Alumni,

I am delighted to be able to extend my warm greetings to you all at the third alumni gathering of the Textile Engineering Department at Daffodil International University (DIU). As we commemorate the accomplishments of our alumni, catch up with old friends, and strengthen the link between the university and its graduates, this day is significant for all of us.

Your successes and contributions in your individual disciplines serve as a testament to the educational, and academic and professional standards you attained at our university. I sincerely hope that your time spent here was worthwhile and that you, in your personal, social and professional life, will use, apply and disseminate the knowledge, skills and experience you gained at DIU for the benefit of your society, nation and the world.

I want to extend my appreciation to the organizing committee for their tireless efforts in bringing together this grand event. It is no small feat to organize an event of this scale, and I do appreciate their dedication and hard work that have made this event successful. I also want to thank our sponsors and supporters who have made this event possible.

I encourage you all to use this opportunity to reunite with your peers and mentors, share your experiences, and treasure new memories as you come together today. This reunion is a symbol of the power of our alumni community as well as a celebration of individual successes. This reunion should motivate you to maintain contact with one another and the university and to continue contributing to its expansion and advancement.

I hope you will continue to make us proud and wish you the best of luck in all of your future pursuits.

Thank you.

Professor S. M. Mahbub-ul-Haque Majumder, Ph.D.

Message from the Dean, Academic Affairs

Dean, Academic Affairs
Daffodil International University

Dear Distinguished Alumni,

It is my pleasure to welcome you all to the third alumni reunion of the Textile Engineering Department at Daffodil International University. It is real evidence of the kind of education we offer that this gathering of some of our institution's brightest brains is taking place.

As an academic institution, our mission is to provide our students with the knowledge, skills, and values necessary to become successful and responsible members of society. The reunion today is a reflection of the success that our alumni have achieved, and we take immense pride in your accomplishments. The textile industry is a vital sector of the economy, and we are proud to have contributed to its growth and development through our Textile Engineering Department. Our graduates have gone on to become leaders in this field, and their contributions have helped shape the industry in significant ways. The academic programs at Daffodil International University are designed to provide our students with a comprehensive education that prepares them for the challenges of the real world. We aim to provide our students with a solid foundation in their chosen fields, as well as the critical thinking and problem-solving skills necessary to succeed in today's rapidly changing world.

I would like to take this opportunity to thank our faculty members for their dedication and commitment to providing our students with a high-quality education. They work tirelessly to ensure that our students receive the best possible education and are well-prepared for their future endeavors.

Finally, I would like to congratulate all of our alumni on their achievements and commend them for their continued support of our institution. The reunion today provides an excellent opportunity for you to reconnect with old friends, make new connections, and share your experiences with others. We hope that this reunion will inspire you to continue to pursue excellence in your respective fields and to make a positive impact on society.

Thank you all for being a part of this momentous occasion, and I wish you all the very best for your future endeavors.

Professor Dr. Mostafa Kamal

Message from the

Dean, Faculty of Engineering (FE)

Dean, Faculty of Engineering (FE)

Daffodil International University

Dear Alumni,

It is my pleasure to welcome you all to the third alumni reunion as the Dean of Daffodil International University's faculty of Engineering. We are honored to have you here with us today for this significant event that brings together our alumni from all across the world.

We aim to provide our students with a solid foundation in their chosen fields, as well as the critical thinking and problem-solving skills necessary to succeed in today's rapidly changing world. Our faculty members work tirelessly to ensure that our students receive the best possible education and are well-prepared for their future endeavors and career challenges. They are dedicated to providing our students with the knowledge, skills, and values necessary to become successful and responsible members of society.

Your chance to catch up with old friends, meet new people, and talk to others about your experiences at the reunion would be much more attractive. We hope that this experience will motivate you to keep going after greatness in your various sectors and to have a beneficial influence on society.

Finally, I would like to express my gratitude to our alumni for their continued support of our institution. Your contributions, whether they are financial, academic, or social, help us to maintain our position as a leading academic institution. We are proud of our alumni and their accomplishments, and we look forward to seeing what the future holds for all of you.

Thank you.

Professor M. Shamsul Alam, PhD

Message from the

Assistant Professor & Head (In-Charge)

Assistant Professor & Head (In-Charge)

Department of Textile Engineering
Daffodil International University

Dear Fellow Alumni

As the Head of the Textile Engineering Department and alumni of the same department, it is my great pleasure to welcome you all to the 3rd Alumni Reunion of our department. It is a significant occasion for us to come together today to celebrate our accomplishments, to make our bonding stronger, to strengthen our network and to rekindle our friendships with our friends, juniors and seniors.

The Department of Textile Engineering has come a long way since we were students here. Today, we are proud to see that our department is renowned for its excellence in teaching and research and our graduates are in high demand in the industry. This is a testament to the hard work and dedication of our faculty members and the quality of education that provided here.

As alumni, we represent the legacy of our department and we are proud to be a part of it. Our achievements are a reflection of the education and values that we received here. We are grateful to the alma mater for providing the knowledge, skills and support necessary to succeed in career and life.

This reunion provides us with an opportunity to reflect on our journey since we graduated from this department. We can also use this occasion to give back to our department by contributing our time, resources and expertise to support its continual growth and development.

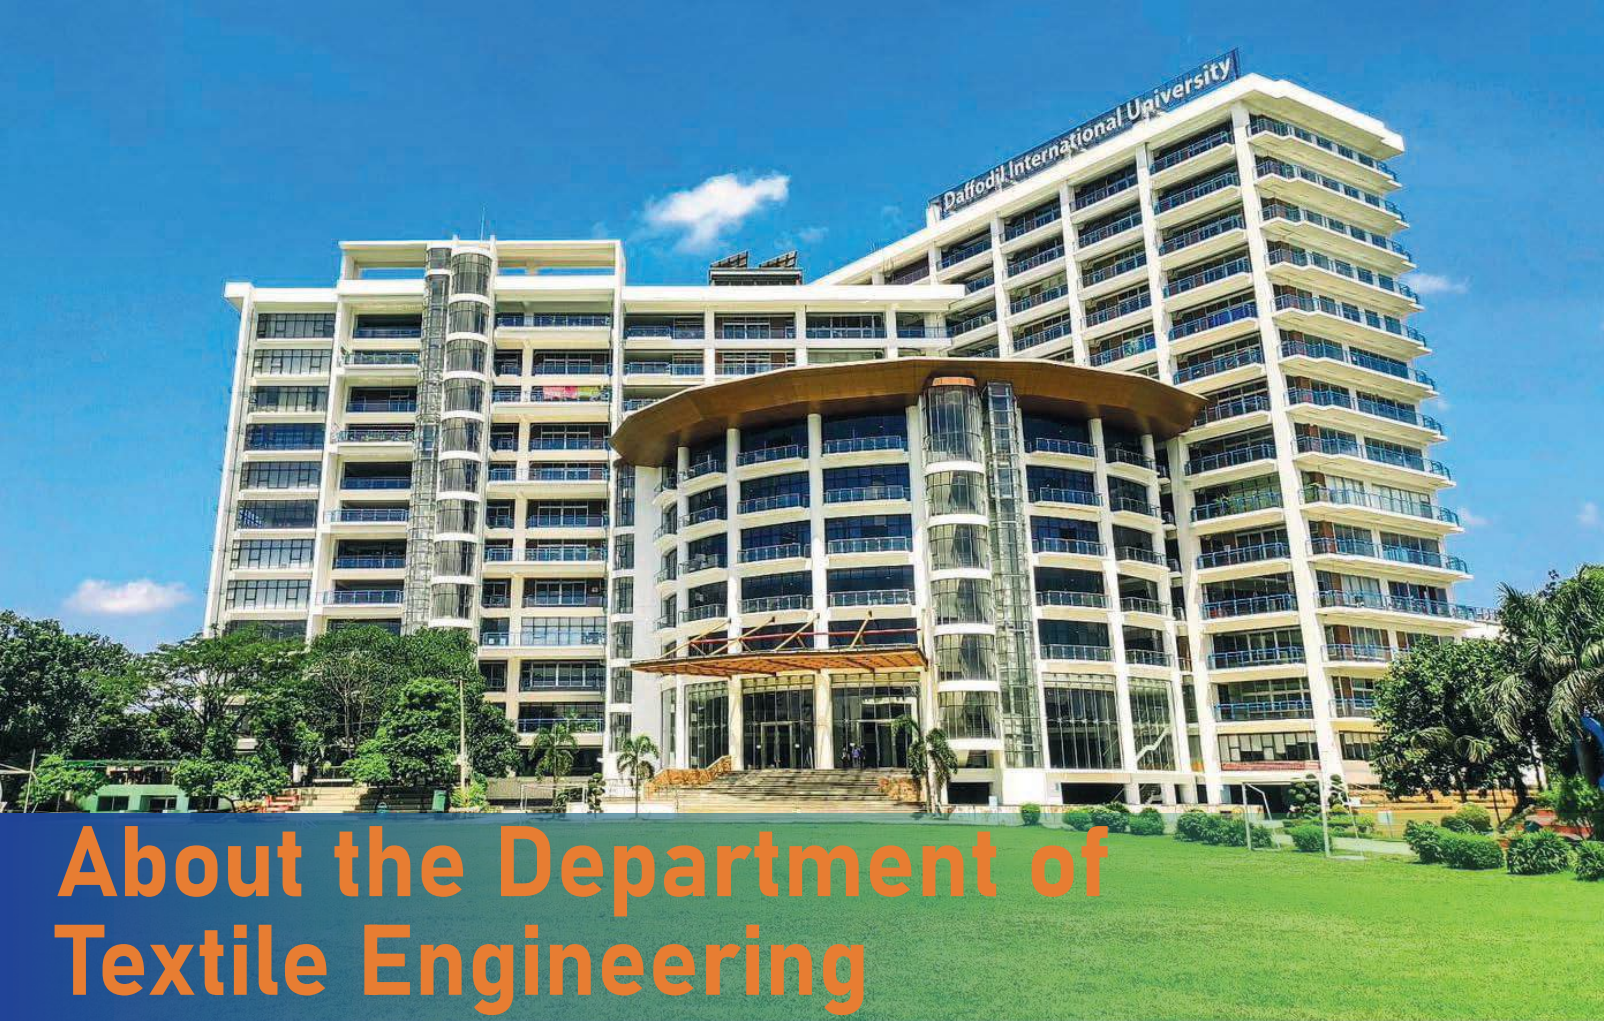

I am honored to be standing before you today as the Head of this esteemed department. I promise to work tirelessly to uphold its reputation for excellence and to provide our current students with the same quality of education.

In conclusion, I would like to express my heartfelt gratitude to all of you for attending this reunion. Let us use this occasion to celebrate our accomplishments and to renew our commitment to our department and to each other.

Thank you

Md. Mominur Rahman

About the Department of Textile Engineering

The Department of Textile Engineering at Daffodil International University, Bangladesh, is a world-class academic institution that combines the principles of engineering with specific knowledge of textile equipment and processes. Established in 2005, the department has a distinguished faculty of experienced professors who hold advanced degrees from prestigious institutions in Germany, India, Japan, Sweden, the United Kingdom, and the United States.

The program's primary aim is to create textile and clothing engineering graduates to meet the growing demand of the textiles and ready-made garment sector, which is Bangladesh's highest foreign currency-earning sector. With an emphasis on both theoretical and practical education, students are trained to become experts in different areas of engineering, including mechanical, electrical, computer, chemical, instrumentation, electronic and structural engineering.

The department has already established state-of-the-art laboratories with modern instruments, including a textile testing and quality control lab, yarn manufacturing lab, fabric manufacturing lab (both weaving and knitting), wet processing lab, apparel manufacturing lab with CAD facility, engineering drawing lab, mechanical engineering lab, computer lab, physics lab, and chemistry lab. The labs are continually updated and upgraded with new instruments and machines to keep up with the latest technology.

In addition to the undergraduate program, for the first time in Bangladesh, we introduced an M.Sc. in Textile Engineering in the summer of 2009. The M.Sc. program is designed to prepare students for advanced research and development in the textile industry and is taught by faculty members who are experts in their respective fields.

The department also maintains corporate membership with The Textile Institute and IEOM, providing students with access to a wide range of resources and networking opportunities. With over 6,000 graduates already working in various reputed textile and garment industries, local and foreign buying houses, textile dyes and chemical companies, the department has a proven track record of producing skilled graduates who are well-prepared to make a significant impact in the industry.

Overall, the Department of Textile Engineering at Daffodil International University is a highly regarded academic institution that provides students with a comprehensive education in the field of textile engineering. With a focus on both theoretical and practical education, state-of-the-art facilities, and experienced faculty members, the department is well-equipped to meet the growing demand for skilled manpower in the textile and garment industries.

SYNTHETIC FILAMENT: A VIABLE CHOICE FOR BANGLADESH'S TEXTILE INDUSTRY

By

Subrata Majumder

Lecturer

Department of Textile Engineering
Daffodil International University

1. Introduction

Bangladesh's weaving industry has a long history and contributes significantly to the country's economy. The weaving industry in Bangladesh has adopted many programs to promote environmental conservation, social well-being, and economic progress, with an increasing emphasis on sustainability and responsible production standards. This article examines the sustainability of Bangladesh's weaving business, stressing the progress achieved toward sustainable methods, the problems encountered, and the possibility for future growth.

The weaving business has seen a change spurred by sustainability in recent years. Traditional handloom techniques were merged with modern techniques, resulting in more efficient manufacturing procedures and higher quality. This integration has boosted market access and economic growth potential for both traditional craftspeople and commercial weaving firms.

2. Market Diversification and Global Demand

Fashion and Sportswear Industries:

Manmade filaments are in high demand in the fashion and athletic industries due to their desirable attributes like moisture-wicking, stretchability, and quick-drying properties. Bangladeshi weavers can tap into these lucrative markets by adding synthetic filaments into their wares, catering to the changing needs of fashion-conscious and active consumers globally.

Technical Textiles and Industrial Applications:

In technical textiles and industrial applications such as automotive, geotextiles, protective garments, and medical textiles, manmade filaments are widely used. Bangladeshi weavers can expand their customer base and diversify their revenue sources by taking advantage of the advantages of synthetic filaments.

3. Sustainability and Environmental Considerations

Bangladesh's weaving sector has acknowledged the value of sustainable techniques in resolving environmental issues and reaching international standards. Several measures have been launched to reduce the industry's environmental footprint while retaining profitability. Despite its growth, Bangladesh's weaving sector confronts various difficulties on its way to sustainability.

Use of Natural and Organic Materials:

Weavers in Bangladesh have been using renewable and biodegradable natural fibers such as cotton, jute, and silk. Organic agricultural practices are recommended in order to reduce chemical use and improve soil health. These natural materials offer a more sustainable alternative to synthetic fibers, decreasing pollution and waste.

Reduced Water Consumption:

When compared to natural fiber production, synthetic filament synthesis consumes substantially less water. The cultivation of natural fibers, notably cotton, necessitates a large amount of water for irrigation, causing water scarcity worries in many areas. Bangladesh may ease water stress and ensure appropriate water management by promoting synthetic filaments.

Energy Efficiency:

The weaving industry's energy-intensive processes are being streamlined for greater energy efficiency. To reduce electricity consumption, manufacturers are investing in contemporary machinery, employing new technologies, and developing energy management systems. This change not only decreases environmental effect but also assists businesses in cutting expenses and remaining competitive.

Waste Management and Recycling:

The weaving industry promotes waste reduction and recycling procedures aggressively. Fabric waste is being reduced through efficient production planning and the use of remnants. Recycling efforts are underway to turn textile waste into new goods or raw materials. In addition, wastewater treatment plants are being built to reduce water contamination caused by dyeing and finishing procedures.

Some important overview of the total environmental impact of manmade and natural fiber based product can be shown as the table below:

Environmental Impact	Manmade Filaments	Natural Fibers
Water Consumption:	Lower	Higher
Chemical Usage:	Lower	Higher
Greenhouse Gas Emissions:	Lower	Higher
Waste Generation:	Recyclable	Biodegradable

Data Table 1: Environmental Impact of Manmade Filaments vs. Natural Fibers

3. Economic Benefits

Reduced Dependency on Natural Fibers:

Extreme dependence on natural fibers may expose Bangladesh's textile sector to huge threat in terms of business. The industry may avoid these risks and create a more stable and resilient supply chain by diversifying its raw material base with synthetic filaments. Moreover the agricultural production of natural fibers like cotton, silk and jute is very negligible in volume compared to the yearly consumption necessary for both export and local market. As a result approximately half of the revenue earned from the RMG and Textile export seems to be spent in buying raw materials specially cotton. If Bangladesh can look forward to developing their existence in diversified and value added synthetic RMG and Textile, then it will not be necessary to depend on other countries to spend almost half of the earning or revenue in sourcing raw materials.

Cost Effectiveness:

Synthetic filaments are typically less expensive than natural fibers. They are produced at a lesser cost, allowing them to compete in the global textile market. Adoption of synthetic filaments can give Bangladesh's textile sector a competitive advantage, attracting international consumers and increasing exports.

Export Opportunities:

Global demand for textiles created from synthetic filaments is increasing continuously. Bangladeshi weavers may tap into this developing market and boost their export potential by adding synthetic fibers into their product offerings. This might result in increased income creation and economic growth for the weaving industry.

Market Segment	Annual Growth Rate (%)
Fashion and Sportswear	7-9
Technical Textiles	8-10
Industrial Applications	6-8

Data Table 2: Global Market Demand for Textiles Made from Manmade Filaments

4. Challenges and the Way Forward

Fair Trade and Social Responsibility:

Fair trade is gaining popularity in the weaving business, with the goal of ensuring fair salaries, safe working conditions, and social welfare for craftsmen and workers. Organizations and certificates promote ethical practices while also empowering craftsmen and encouraging communal development. Such programs have a favorable impact on weavers' and their families' livelihoods, supporting social sustainability.

Market Access and Global Competition:

Many developed countries have shown a growing preference for synthetic filaments due to their durability, versatility, and affordability. Bangladesh may increase its market access and acquire a larger portion of the global textile market by aligning with this trend. The weaving industry in Bangladesh competes with worldwide manufacturers, needing constant innovation, quality improvement, and diversification. Accessing foreign markets, creating long-term supply chains, and meeting high criteria can be difficult for small-scale weavers and businesses.

Technological Advancements:

Significant technological breakthroughs have resulted in enhanced quality, consistency, and inventiveness in synthetic filament manufacture. Advanced manufacturing technologies enable the development of high-performance synthetic filaments that match consumers' changing needs. Bangladesh can improve the competitiveness and value proposition of its textile products by implementing these technologies.

Skill Development and Technology Adoption:

To stay competitive, the weaving business need trained artisans and workers who can adapt to new technologies. Investment in training programs and skill development is critical for closing the gap between conventional practices and modern market demands. Technology adoption can improve efficiency and product quality.

Access to financing and support is critical for the weaving industry's long-term growth in Bangladesh. Government efforts, financial institutions, and development organizations can all play an important role in giving financial help, loans, and grants to weaving businesses, particularly small-scale weavers, in order for them to invest in sustainable methods. Collaboration with overseas partners and organizations can also help with information sharing, technology transfer, and market access.

Conclusion

The weaving business in Bangladesh has the potential to increase value addition through the use of manufactured filaments. Manmade filaments have significant advantages over natural fibers due to their adaptability, greater quality, and lower environmental effect. The global market demand for synthetic filament textiles is increasing, and Bangladesh may capitalize on this trend to improve its export potential and generate economic progress. Furthermore, the use of man-made filaments can help to create jobs and contribute to the country's environmental goals. By harnessing the potential of synthetic filaments, Bangladesh's weaving sector can improve its position in the global textile industry and pave the road for a bright and sustainable future.

Future Fashion Trends

Fashion is defined on various way, where we have different parameters to determine a person's fashion sense. A Human's way of behaving, dressing, movement , writing even his or her performing is included on Fashion sense. Textile and Textile materials are a great and one of the best medium to state a person's consciousness about fashion. Western countries are so much focused on fashion on their regular life and according to them Textiles and Apparel industry is run by. This is highly depends on fashion trends.

Fashion trend is must be influent by seasons. Based on weather people chose their outfits and others wearing. Typically fashion is split into four seasons. They are Spring/Summer, Fall/Winter, Resort, and Pre-Fall. Vogue Fashion split it by straight four seasons Winter, Summer, Spring and Fall season. Seasons are pretty basic thinking and it is followed from the beginning of fashion industry.

We can determine fashion forecast according to seasons easily and conventionally. But world is changing by economically and climate is under negatively changing. Here many facts arise when we are thinking about to do a lifelong concept like fashion.

We should talk about basics of fashion to find out future trends of fashion those are incoming soon. As we are mostly focusing on clothing on fashion, we need to know about classification of fashion. Here we have three basic classifications of clothing according to fashion. These are Basic Products, Classic products and Fast or FAD fashion. Basic products don't follow any trends or hype , always producing some as usual products is under this classification .Basic products are based on current choice of mass peoples. It stay for a moderate period, may be a generation. But, FAD fashion is so much temporary. It's totally based on current trends. So, to talk about future fashion trends, we need to focus on FAD fashion. Is it good to follow the trends for longer or anything else should be considered!

Now a days, every business idea and strategy is fixed on some basic surroundings. Is this idea match to current environment or future environment? If the answer is yes, then an entrepreneur take step to do the business. Fashion industry is following this same way. This article is going to heat the meat of main topic.

On behind of changing the fashion trends Sustainability and digitation will ply most and vital rules. Ans it's going to be so true, no retailers, no company can not avoid digitation as it will determine the sustainable way to produce products. Data and information are so much important to find out best prediction about fashion trends. Cognitive computing is a great way to collect vast amount of data from wide range of sources including social media to political polls. WGSN, world's biggest fashion forecaster is already using AI to find out best forecast of trends. They have noticed that using AI can reduce forecast fault by 50%. That is so important to sell the products rather than keep the unsold item on store.

According to AI and others forecasting sources next world fashion will be focused on some trends those will shape the future fashion.

Health and Wellbeing

Since corona outbreak health is a matter of concern but before that it was exist and had equal importance. People are trying to keep themselves free from newly born germs as well as a huge number of populations is equal to huge number of diseases spreading. Peoples are looking for best protection as well as wearability. A wide range of clothing containing antiviral properties are being developed.

More than that people are used to stay home or workplace for longer. That time they are requiring to do activity. That lead to do physical activity that is included to sports.

So it can be said sports fashion have a great opportunity to be on a basic fashion trends.

Mass people are getting know about feel comfort on workplace. That is a considerable point of view that can be implemented by active wear, sporty and breathable sneakers etc.

Eco friendly fashion

Eco friendly fashion is so much highlighted more than any time before. Just think about 20-25 years before clothing was a disposal commodity. People used to buy cloth on regular basis and the waste was decomposed somehow. But in this fast fashion era we are changing our clothing on a very short time. Fact is our used materials are not eco friendly most of the time. It's high time to find best way to solve the problem that may occur damage to environment. We have different way to maintain a eco friendly fashion trend. Such as,

Sustainable material: Many research are happening upon different types of sustainable raw materials such as organic cotton, bamboo, hemp, flax etc. They can be a durable alternative to many synthetic materials. These materials will helps to reduce carbon footprint

Circular fashion:

It's a kind of loop creating on fashion to mitigate wastage to protect environment. We can think about 3R , REDUCE, REUSE and RECYCLE. As possible create less wastage then remain material can go through reuse. And finally if that is not usable do it recycle ex. Making jersey from pet bottle.

Ethical production practice:

It should be confirmed that working place of fashion creating is fair and human friendly. Where including wages of worker, safety of working place etc.

Consumer behavior: It's a biggest fact about fashion. What is demand of consumers? Why they are looking for sustainable product? Or how to make them get face to sustainable fashion!

Comfortable and versatile products

Already on health and wellbeing part it was mentioned that people are getting concern about comfortability. Another part should be added there that is, versatile use of fashion products. We have some basic wear those are used on an exact style. It's a non-versatile state of fashion. Let think about T- shirt. We can wear it alone with a trouser. But if we look at versatile way, we can wear it with a sweat shirt for a bold casual look.

Vintage and retro may come back

People love to get themselves on nostalgia or something bold from past. Retro fashion is refers to back to a fashion that is from a particular past time ex. 1950s or 1990s. Media do show that types of fashion. On other hand vintage is also fashion from a past time but on a large scale and the time period may vary to 20 years to 100 years. Sometime a single decade may also considered as vintage

fashion. There may be a overlap between concept of retro vs vintage, but this article is not about explain them, it should be keep in mind that both are past fashion trend.

Live shopping

Another created trends after corona pandemic. It sounds like marketing concept not any fashion trend. But it's a part of fashion as we are trying to get out products on our door. So what can be done here as fashion!! It's pretty easy to understand if we have concept about "bespoke" As AI is going to dominate fashion industry here people can generate or modify their own style using personal tool. There will be a totally different fashion trend that will be totally under control of clients. Order and receive the product. Fashion industry will be a skeleton of this trend.

Market is the best room to innovate and find out the trends. Now with this artificial intelligence and global warming is included. As a result future trends will be based on each of these. A fashion enthusiast person will take eye on all surroundings. Creator will take study from market and reach to consumers that are they really wanting sustainable products. If they get all on a window then for sure future will be up to sustainable theory on a very short time. If consumers are not aware about sustainability then many environment saving organization will let them get into this. It's true that we will be so much depend on AI as it gives us a maximum appropriate forecast.

Idea Innovation For RMG Sector.

In each and every RMG industry all over Bangladesh 8-10% of employees are quality people. This percentage was considered based on all employment, it will be more considering the direct employ. after the massive investment in this non-value-added but unavoidable process, we are not ensuring the proper quality. For that, we are losing buyer trust, and the brand pressures us for Quality. As a result, they are controlling the quality system as their wish and advising adding more people, also depending on the third party which is increasing the cost. At the same time, the Quality team is fighting with the operational team, blaming each other and increasing the distance between them. That is why we are not achieving our goal and not meeting the price in the world market.

To overcome this situation, we can take some easy, effective, and low-price consumption strategy

1. Thinking of Quality:

We guess, Buyer who will be happy to see the big quality team and long/complex process of quality. The buyer's main aim is quality-able goods not on our quality team/QMS, because they are not paying for this. But it needs to show and prove a trustable quality system whatever we ensure it. We need to reduce the dominating power of customer regarding the quality system by selecting effective, correct and cheapest quality management system.

2. Involve Operational people:

: The operator is the father and mother of a process, his/her willingness can ensure proper quality. Without his/her involvement it is impossible to ensure the right quality of whatever we do. We can involve direct operators in quality activities by different techniques like as Zero-defect operator, SUM (Standup meeting) work with daily basis quality findings, QCC team (Quality cycle team), and reward/insensitive system can be sustainable solution. Which can be reduce the cost of quality investment and quality manpower below 5% of direct labor.

3.Focus on Quality Assurance:

Most of the factories are working/investing in corrective quality systems which are post activities. As a result, we are taking action after occurring the quality issues which is why we are not improving our quality. So, we need to preventive action to ensure the right quality as well as setting specific quality goals. Set a quality guideline and operation procedure before each and every bulk production and strongly followed by operational and quality team.

4.MIS, Training, and Awareness:

Setting a Quality information system with the right way to take accurate decisions at the right time and right way. We can calculate the quality blocking rate, working with it regular basis. To ensure the right quality we need to work on skill management by training, motivating, and rewarding. Another important matter is to increase the quality awareness, ethics, and values of all employees.

To sustain this competitive business each and every micro waste need to save and the added value. Upcoming days will be more competitive so we have no alternative but to focus on reducing cost and improving the quality.

স্মৃতি চারণ

বিশ্ববিদ্যালয়ে আমার সবচেয়ে স্মরণীয় মূর্ত্ত হচ্ছে টেক্সটাইল কার্নিভাল ২০২২ এর সন্ধ্যা ৭ টায়। যখন মঞ্চের এককোণায় দাড়িয়ে দেখতে পারলাম ক্যাম্পাসের অডিটরিয়াম এবং সামনের প্র্যাকটিস গ্রাউন্ডে সম্ভাব্য ১৫০০০ দর্শকের উচ্ছ্বাস।

এখন আসি এর পেছনের গল্পে। ২০১৯ সালে যখন এই বিশ্ববিদ্যালয়ের টেক্সটাইল ডিপার্টমেন্টে ভর্তি হই, তার কিছুদিনের ভেতরই টেক্সটাইল কার্নিভাল ২০১৯ হয়েছিল। আমিও রেজিস্ট্রেশন করেছিলাম। কিন্তু আমার বোনের বিয়ের কারণে ওই কার্নিভালে উপস্থিত থাকতে পারিনি। তখন সামাজিক যোগাযোগ মাধ্যমে ঢুকলে দেখতাম সব ব্যাচের বন্ধু-শুভাকাঙ্ক্ষীদের একসাথে আনন্দ-উল্লাসের ছবি। কেন যে উপস্থিত থাকতে পারলাম না এই ভেবে আমার ভীষণ খারাপ লাগা কাজ করেছিলো তখন।

বোনের বিয়ে শেষে যখন আবার ক্যাম্পাসে ফিরলাম, তখন দেখলাম ওই অনুষ্ঠানের ৭ দিনে শিক্ষক-সিনিয়র-জুনিয়র-ব্যাচমেটদের মধ্যকার যোগাযোগ, বন্ধন আর ভীষণ আন্তরিকতা। কেমন যেন সবার মধ্যে খুব বেশি আত্মিক সম্পর্ক গড়ে উঠেছে। তখন আমি ডিপার্টমেন্টের সবচেয়ে জুনিয়র ব্যাচের ছাত্র।

এরপর চলতে থাকলো ক্লাস-পরীক্ষার আবহ। সময়ের সাথে সাথে ধীরে ধীরে শিক্ষক-ব্যাচমেট-সিনিয়র জুনিয়রদের মধ্যে চমৎকার সম্পর্ক গড়ে উঠতে থাকলো। ক্যাম্পাস-ডিপার্টমেন্টকে ভীষণ আপন মনে হতে থাকলো। এটা যেন শুধু কাঠামো নয়। এটা একটা পরিবার। সবাই মিলে একটা পরিবার।

তারপর শুরু হয়ে গেলো ভয়াল কোভিড -১৯ পিরিয়ড। সবাই দূরে চলে গেলাম। একেকজন একেক জায়গায়। আধো যোগাযোগ - আধো বিচ্ছিন্ন অবস্থায়। মাসের পর মাস বন্ধু-সিনিয়র-জুনিয়রদের সাথে যোগাযোগ বিচ্ছিন্নতা শুরু হয়ে গেলো। এসব কারণেই কার্নিভালও আর হয়নি। নতুন ছাত্ররা তাদের সিনিয়র-ক্যাম্পাস আর ডিপার্টমেন্টের সাথে সেভাবে আত্মিক সম্পর্ক গড়ে তুলতে পারলো না।

নতুন করে আবার ক্যাম্পাস খুললো। সম্পূর্ণ একটা নতুন ক্যাম্পাস, নতুন ডিপার্টমেন্ট। আমাদের সিনিয়ররা এখন সিনিয়র নেই, অ্যালমনাই হয়ে গেছে। আমিও তখন তৃতীয় বর্ষের ছাত্র। আমারও অনেক জুনিয়র হলো-তাদেরও অনেক জুনিয়র হলো। অপরিচিত লোকের সংখ্যাই বেশি, চেনা মুখ কম তখন আমার এক ব্যাচ সিনিয়র ক্যাম্পাসে আর আরেক ব্যাচ সিনিয়র ইন্টার্নশিপে ছিলো। ডিপার্টমেন্টের বিশেষ দুইজন শিক্ষক এবং সিনিয়র দুইব্যাচসহ আমাদের ব্যাচের শিক্ষার্থীরা উপলব্ধি করতে পারলাম ডিপার্টমেন্টে এমন কিছু হোক যা আবার আমাদেরকে একত্রিত করে তুলতে পারে, আমাদের এবং অ্যালমনাই ভাইয়াদের সাথে একটা সুন্দর সম্পর্ক গড়ে তুলতে সাহায্য করে।

তারপর শুরু হয়ে গেলো যুদ্ধ। শিডিউল মেলানো, শিডিউল পাওয়া, পরীক্ষা, আগে থেকে ফিক্সড প্রোগ্রামের জন্য কিছুই মেলানো যাচ্ছিলো না।

হঠাত করে ডিপার্টমেন্টের একজন বিশেষ শিক্ষকের কল।

- ১৫ দিনের মধ্যে সবকিছু শেষ করতে পারবি? যদি পারিস তাহলে কাল ক্যাম্পাসে চলে আসবি।

এমন কল আরো কয়েকজন সিনিয়রকেও দেয়া হলো। আমাদের সবার উত্তর ছিলো আমরা ১৫ দিনে এটা করে ফেলতে পারবো।

স্যার একটা ডেট মেনেজ করে দিলেন। আমরাও প্রাণপনে কাজ শুরু করে দিলাম। সিনিয়র- জিনিয়ররা সবার ভেতরেই একটা উদ্দীপনা কাজ করা শুরু করলো। আর এই জায়গাটায় সবচেয়ে বেশি সাহায্য করেছে আমাদের ডিপার্টমেন্টের একজন শিক্ষক। যিনি শিক্ষার্থীদের মধ্যে অনেক জনপ্রিয়।

এরপর আমরা প্লানিং করতে থাকলাম। বিগত কার্নিভালগুলোর সাথে যারা সম্পৃক্ত ছিলো তাদের সাথে যোগাযোগ করলাম। সিনিয়র-জুনিয়রদের মধ্যে অনেকে খুবই আগ্রহী ছিলো যারা দিনরাত অক্লান্ত পরিশ্রম করেছিলো। সবকিছু শেষ করলাম।

এবার আমাদের সামনে আসলো আরেক চ্যালেঞ্জ। আমরা আনবো একটা ব্যান্ড। যে ডেটটা দোয়া হলো সেটা ছিলো শবে বরাতের সন্ধ্যা। ক্যাম্পাসের কর্তৃপক্ষের কাছ থেকে বিশেষ কয়েকজন শিক্ষার্থীর ও একজন শিক্ষকের অনুরোধে আমরা পরেরদিনের ডেট পেতে সক্ষম হয়েছি।

আমাদের একজন শিক্ষকের কল ও অ্যাশেজ ব্যান্ডের বিশেষ আন্তরিককতায় ডেটটা পেছানো সম্ভব হলো মূল অনুষ্ঠানের মাত্র তিনদিন আগে। এত অল্প সময়ের মধ্যে আমরা সব অ্যালমনাইদেরকে কাছ পৌঁছে দিতে ব্যর্থ হয়েছি। কিন্তু আমরা আমাদের ডিপার্টমেন্টের পেইজে খোলা চিঠিতে সবাইকে দাওয়াত দেয়ার চেষ্টা করেছি। জানিনা কতটুকু পৌঁছাতে পেরেছি।

এ অনুষ্ঠান উপলক্ষে, আমার জানামতে এমন দুইজন শিক্ষার্থী এবং একজন শিক্ষক অনুষ্ঠানের আগের নয়দিনে দৈনিক চার ঘন্টাও ঘুমাতে পারেনি। প্রোগ্রামের আগের রাতে এমন অনেক শিক্ষার্থী ঘুমাতেই পারেনি।

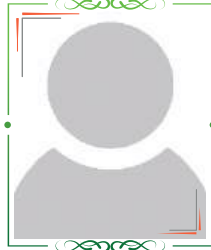

তারপর এসে গেলো সেই মাহেন্দ্রদিন। অনুষ্ঠান শুরু হলো। আগের মতোই খেলাধুলা-আড্ডা-প্রতিযোগিতা-পারফরম্যান্স হলো। শিক্ষক- আমন্ত্রিত অতিথি এবং শুভাকাঙ্ক্ষীদের শিক্ষার্থীদের উদ্দেশ্যে বক্তব্য দেয়া হলো।

এখন চলে আসলো মাহেন্দ্রক্ষণ- সন্ধ্যা ৭ টা। অ্যাশেজ তখন মঞ্চে। আমিও তখন এমন এক জায়গায় যেখান থেকে সম্পূর্ণ ক্রাউড দেখা যায়। সেই মূহুর্তেটায় মনে হয়েছিলো আমাদের বিঘত কয়েকদিনের ঘুম বিসর্জন আর অক্লান্ত পরিশ্রম যেন এত দর্শকের উদ্দীপনার কাছে কিছুই না।

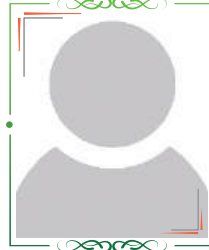

ঠিক তখনই এমন দুইজন শিক্ষক চোঁখে পড়লো যাদের সাথে জীবনে করমর্দন করারও সাহস পাইনি। চোঁখে চোঁখে কি হয়ে গেলো জানিনা তাদের সাথে হাই-ফাইভ করে উঠলাম। বলে উঠলাম - ' আমরা করতে পেরেছি'। যদিও অনুষ্ঠানে আমাদের আয়োজকদের অনেক ভুলত্রুটি হয়েছে।
